

## Green Plumbing Trends-a New Chapter in Hot Water Heater Technology

Why heat water for your home 24 hours a day? If you are the average homeowner you are paying to heat water even when you don't need it. With an average 50 gallon water heater, you can get approximately 3-4 back to back 10 minute showers. How does an endless supply of back to back showers sound?

Rinnai tankless water heaters provide a more efficient, energy saving way to heat water. Rinnai tankless water heaters heat water only as you need, on demand for as long as you need it for, but no longer. With a Rinnai tankless water heater you only pay to heat water when you need it.

Sound too good to be true? Here's the facts, Rinnai tankless water heaters:

- Supply endless hot water to multiple outlets at the same time without fluctuations in temperature.
- Are up to 50% more efficient than a traditional natural gas water heater and up to 70% more efficient than a standard electric water heater.
- Provide typical savings of 30%-45% when compared to old style water heaters.
- Shut off automatically when the faucet/ shower is turned off.
- Are compact wall-mounted water heaters with a life expectancy of 25 years, as compared to standard hot water tanks that require approximately 16 square feet of space and last about 10 years. Longer equipment life reduces landfill waste.
- Lowers the emission of CO<sub>2</sub> gases into our atmosphere.

Whether space, energy savings, or the need for multiple showers is your issue, a call to an **AUTHORIZED SERVICE PROVIDER/INSTALLER** is your key to success. Without a quality installation even the best equipment will fail to give you the performance its capable of. For trouble free installation and maximum performance, **ADAMS PLUMBING & HEATING'S** knowledgeable, well-trained and certified staff are only a phone call away. Call **(303) 670-9171** today for a free estimate.

Other random thoughts:

Because of its compact size it can be placed in close proximity to the kitchen or master bath reducing wait time and energy consumptions while waiting for hot water at source.

It provides protection for your family, as opposed to standard gas water heaters, Rinnai tankless water heaters have sealed combustion which means no open flame or flue gas.

So there's no way for flue gas to enter the home. In addition precise water temperature control helps prevent the risk of scalding
